3 Line Break

we can give line break in two ways. by pressing enter two times or by using.

here i have come to the second line because i have used a symbol reverse slash

otherwise we have to press enter for two times. so i think its better

to use reverse slash instead of pressing enter two times.

4 Combining both heading and block of code

for heading i have used hash 3 times and for block of code as-usual i have used greater

than sign
